PROFESSIONAL SUMMARY

Frontend Developer with a current remote internship and **3 live, deployed projects**: an e-commerce platform and two client applications. Builds responsive, component-based interfaces with **React.js**, **Redux Toolkit**, **JavaScript**, and **Tailwind CSS**, and integrates **REST APIs** with Axios. Experienced with **role-based access**, reusable component design, and Git/GitHub workflows. Seeking a **Frontend Developer** or **React Developer** role.

SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3, Python (basics)

Frontend: React.js, JSX, React Hooks, Redux Toolkit, React Router, Context API, Tailwind CSS, Responsive Design, Mobile-First Design

APIs & Data: REST APIs, Axios, CRUD, async/await, Promises, Firebase, json-server, Node.js (fundamentals)

Tools: Git, GitHub, Vite, VS Code, Postman, Vercel, Linux, EmailJS

Concepts: Component-Based Architecture, State Management, Role-Based Access Control, Conditional Rendering, Reusable Components

EXPERIENCE

Frontend Developer Intern, BetterInu Jan 2026 – Present

Remote

- Engineered responsive, mobile-friendly web interfaces using **React.js**, **JavaScript**, **HTML5**, **CSS3**, and **Tailwind CSS**.
- Designed and built **reusable React components** with JSX, props, and state; integrated **REST APIs** using **Axios**.
- Collaborated with teammates using **Git** and **GitHub** for version control and task-based development.

PROJECTS

SOLEX E-Commerce Website solex-ecommerce.vercel.app

React.js, Redux Toolkit, Tailwind CSS

- Built a customer **storefront** and a separate **admin application** (2 applications) for managing an online shoe store.
- Implemented customer and admin **authentication** with **role-based access** across 2 user roles.
- Managed cart and application state with **Redux Toolkit** and deployed the live site on **Vercel**.

FUWA POS Billing App (Client Project) fuwa-japanese.vercel.app

TanStack Start, React, TypeScript

- Developed a **point-of-sale web app** for a Japanese fluffy-dessert business covering billing, receipts, and order management.
- Implemented product and category management, user management, and **WhatsApp** invoice and order-ready notification workflows.

BIKEMODE Workshop Website (Client Project) bike-mode.vercel.app

React.js, Tailwind CSS, Vite

- Designed and built a **responsive, mobile-first website** for a Royal Enfield specialist workshop using reusable components.
- Delivered and deployed the live site for a real client on **Vercel**.

EDUCATION

Bachelor of Computer Applications (BCA), JAIN (Deemed-to-be University) Expected 2029

Online program, 2026 – 2029
